Swiss Crypto Vault introduces storage for XRP (Ripple)

ZUG, Switzerland, December 19, 2018 Swiss Crypto Vault AG, a provider of best-in-class solution for hyper secure storage of crypto assets to institutions, funds and high-net worth individuals (HNWI) today launched its support of XRP. As of today, clients of Swiss Crypto Vault can securely store XRP within the hyper secure vault.

Philipp Vonmoos CEO of Swiss Crypto Vault said: „Today we deliver on our promise to continually add services and support of new crypto assets to our solution. XRP has established its position as the second largest crypto asset by market cap. This development has further fueled demand from our clients and we are very happy to be able to meet this demand with our comprehensive solution.“

Swiss Crypto Vault already offers hyper secure storage for Bitcoin, Ether, Bitcoin Cash, Litecoin, Bitcoin Gold and all ERC20 and ERC223 tokens as well as Co-Signatory Services for Bitcoin.

About Swiss Crypto Vault

Swiss Crypto Vault AG based in Zug, Switzerland, was established in 2017. It was founded in strategic partnership between Swiss Gold Safe AG and Bitcoin Suisse AG as an independent organization to combine their expertise in storage and crypto asset handling.
