

Vaultoro, the world's first crypto-hedging solution with physical gold since 2015, releases today the

VAULT Membership Token.

A token modeled after Binance's BNB and designed to pay for services within the Vaultoro ecosystem.

VAULT's first functionality is that of a membership voucher, that can be used for reducing trading fees. Everyone holding VAULT will be able to settle their trading fees using the token. This will make trading more affordable and transparent.

What is the VAULT token?

The VAULT token has been created with Vaultoro customers in mind.

VAULT represents one participation in our Software Club Membership. Currently, VAULT can be earned through our referral program by Vaultoro verified users exclusively. As of Q1 2020, VAULT can be acquired and earned by equity investors, team members, and customers through private and public sale; competitions, trading, and other mechanisms.

There will be a maximum of 400.000.000 tokens issued. Tokens will have a free-floating market value and can be used to pay for Vaultoro fees at a discount as well as other upcoming features and services. A percentage of the VAULT tokens will be destroyed upon redemption making it scarce.

Refer Vaultoro to a friend and start earning VAULT today

from 15.08.19 - 04.09.19
